

# Powering Sustainability Since 2018

## Hydromo – Powering Sustainability Since 2018

*Water | Renewables | Enablers | Curated Solutions For Hospitals & Builders*

Founded in 2018, Hydromo has grown into one of India's top 10 companies in the water and renewable energy sectors. For over 8 years, we've been driven by one purpose, to make clean water and sustainable energy accessible, efficient, and affordable across industrial, commercial, and residential spaces.

### Our Solutions

**Curated Solutions**

**HydroEN**

### Why Choose Hydromo?

Unlike standard ready-made setups in the market, Hydromo designs systems that adapt to your goals, whether it's a tight project timeline, unique site constraints, or advanced performance targets.

#### **Customisation**

We don't believe in one-size-fits-all. Every solution we provide is **designed, engineered and customised** to match your specific needs, space, and budget.

#### **Quick Installation**

Our expert teams ensure fast turnaround without compromising quality.

#### **Modern & Future-Ready Tech**

From tried-and-tested solutions to deploying the latest innovations — even if introduced today — we're ready to integrate what works best for you.

#### **Lifetime Support**

From the day of installation, we're with you — offering maintenance, technical assistance, and performance monitoring for long-term peace of mind.

### Water Treatment Plants

The 3-Stage Filtration Process.  
• Glass Media | Activated Carbon | Resin

### Reverse Osmosis

High-purity water ideal for sensitive industrial & commercial needs

### Softeners

Prevents scale buildup & extends appliance life.

### Ultra Filtration

Clears turbidity, Suspended Solids & Pathogens.

### Desalination

Converts seawater into drinkable water with energy-efficient systems.

### Dialysis

Superior purity using Electro-Coagulation technology.

### RO with Chillers

Converts seawater into drinkable water with energy-efficient systems.

# Hydromo's PMC Services

## ***Your One-Stop Partner for Project Approvals, Compliance & Clearances in AP & Telangana***

Founded in 2008, Hydromo has grown into one of India's top 10 companies in the water and renewable energy sectors. For over 17 years, we've been driven by one purpose, to make clean water and sustainable energy accessible, efficient, and affordable across industrial, commercial, and residential spaces.

## We Serve

### Industrial Projects

Manufacturing units, pharma plants, warehousing, food processing, and more.

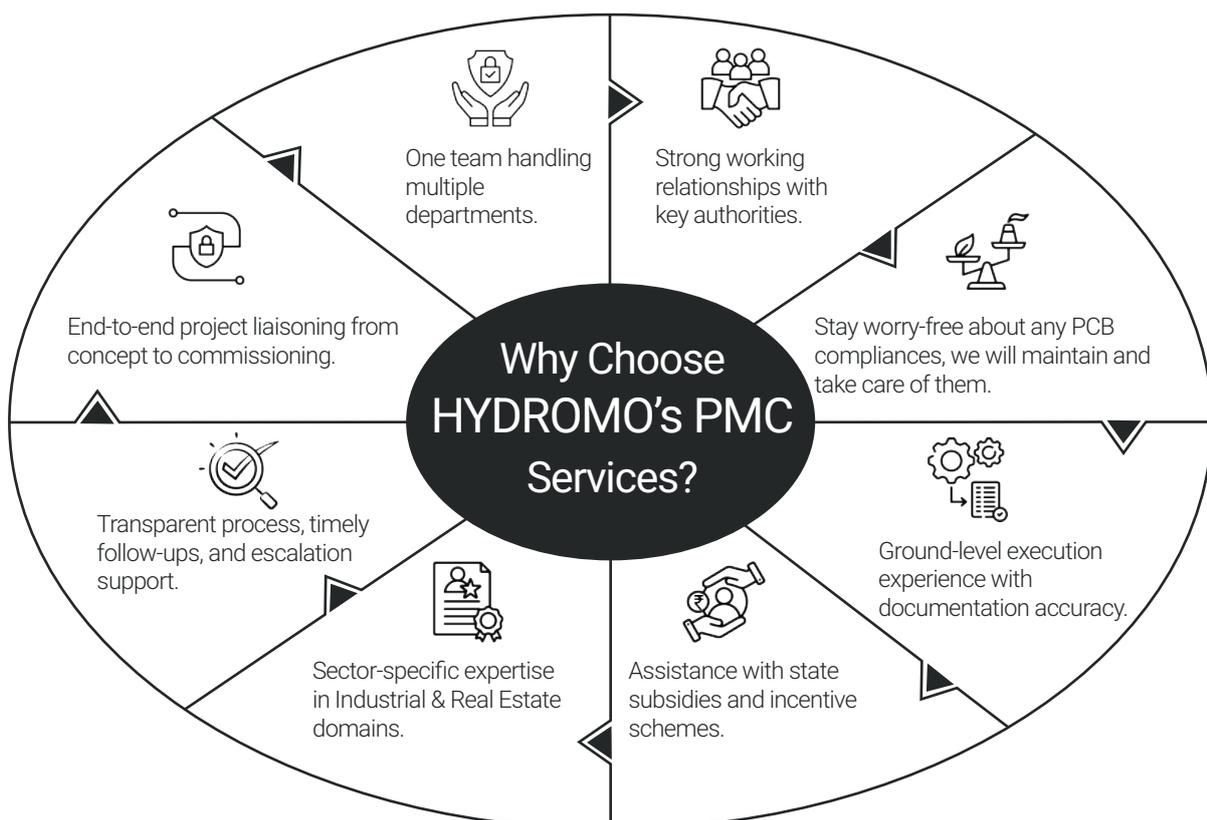

### Real Estate Projects

Residential townships, gated communities, commercial towers, resorts, and plotted layouts.

## PCB Compliance - A Critical Component

Environmental compliance is no longer optional – it's mandatory. Hydromo helps you comply with APPCB & TSPCB guidelines.

We ensure your project is environmentally responsible and future-ready.

## Why Should You Choose HydroEn?

### Convenient

HydroEn offers seamless water and energy solutions designed to enhance your villa luxuriously & sustainably, from start to finish.

### Advanced Technology

Leverage cutting-edge modern technologies for efficient, sustainable, and future-ready water and energy systems.

### Customised

Tailored solutions that align perfectly with your villa's size and financial plan.

### One-stop solution

From water treatment to renewable energy, HydroEn is your one-stop destination for your Villa.

### Regular Maintenance

Comprehensive post-installation services, regular check-ups, and expert care to ensure the longevity and performance of your systems.

### Professional Support 24 X 7

Our team is always available to assist whenever you need us.

### Quick Installation

Quick delivery and setup to keep everything on schedule.

From premium water treatment solutions to energy-efficient systems, HydroEn has everything you need to elevate your villa, making it more luxurious and sustainable.

**A practical planning guide for the systems that make buildings actually work.**

The Hydromo Integrated Engineering Solutions helps architects, builders, and MEP consultants plan critical infrastructure early in a project. It covers key systems like pump rooms, STP sizing, DG positioning, solar capacity, and swimming pools, helping teams avoid late-stage redesigns and execution challenges.

With clear planning references and practical insights, the guide ensures projects are not only well-designed but also reliable and efficient in the long run.
