

Corporate Social
Responsibility
(CSR)

Some investments create returns. The greatest ones create a legacy!

Every Community Has A Story, The Best Ones Begin With Action.

Behind every CSR commitment is the opportunity to change lives. Through CSR implementation initiatives, Hydromo helps organizations deliver clean water, resilient infrastructure, and sustainable solutions that continue creating impact long after the project is complete.

CSR Is Where Intent Meets Action

Behind every CSR budget, there is a vision for meaningful change. Not just to meet requirements, but to solve real challenges, strengthen communities, and create infrastructure that continues delivering value for years to come.

Vision starts it | Expertise delivers it | Communities remember it.

Yet good intentions rarely fail in the boardroom. They fail when execution becomes fragmented, delayed deliveries, disconnected teams, and infrastructure left without long-term ownership.

The budget was real. The ownership wasn't.

| Hydromo exists to bridge the gap between intention and execution.

One Partner | Complete Execution

From design and procurement to installation and long-term support, Hydromo delivers every stage under a single accountable partner.

NEED ASSESSMENT

Understanding what a community truly needs, not assuming it.

SITE SURVEY

On-ground evaluation of water, power, terrain and access.

ENGINEERING

Systems designed for the site's reality, not a catalogue.

PROCUREMENT

The right equipment, sourced and quality-checked.

EXECUTION

Built on-site by our own engineering teams, on schedule.

TESTING

Verified against real performance standards before handover.

COMMISSIONING

Fully operational, documented, ready for the community.

LONG-TERM SUPPORT

Maintained and monitored well beyond inauguration day.

HYDROMO AT A GLANCE

- Environment | Energy | Renewables
- CSR Infrastructure Execution Partner
- End-to-End Project Delivery & Support
- Single Point of Accountability

Infrastructure That Changes Lives

Infrastructure serves a purpose only when it improves everyday life. Every solution we deliver is engineered to solve real challenges and create meaningful community impact.

CLEAN DRINKING WATER

“Safe water, from every tap, every day.”

Delivered through engineered Community RO Plants.

SAFER COMMUNITIES

“Streets that stay lit long after sunset.”

Delivered through Solar Street Lighting.

WATER INDEPENDENCE

“Freedom from tankers. Freedom from scarcity.”

Delivered through Desalination Systems.

Purpose In Every Investment. Precision In Every Project.

Your CSR budget funds outcomes, not products. Here is an indicative view of what each impact area typically requires, final costing always follows a site assessment and community need analysis.

SOLAR STREET LIGHTING

₹2,049 – ₹5,173 per unit (+GST)

Range reflects wattage from single-street coverage to high-footfall public spaces.

COMMUNITY RO PLANTS

₹2.5 Lakhs – ₹5.5 Lakhs

Range reflects daily capacity from a single locality to multi-community scale.

DESALINATION RO SYSTEMS

₹12 Lakhs – ₹18 Lakhs

For coastal and high-TDS regions, sized to population served.

When the planning is right, the investment follows with confidence.

Proven Where It Matters Most.

ANDHRA PRADESH · PARTNER: TATA TRUSTS

Clean Water Access, Mallampudi Village

CHALLENGE

Groundwater unfit for drinking forced daily dependence on unsafe sources, with real health consequences for the village.

SOLUTION

A desalination-based Water ATM, engineered and commissioned by Hydromo under MAATARAM, in partnership with Tata Trusts.

OUTCOME

TDS reduced from a dangerous 13,000 mg/L to a safe 30 mg/L, water now available 24 hours a day, at just ₹7 for 20L, down from a ₹400 market price.

13,000 → 30 mg/L TDS

Brought down to safe drinking standard, 24/7

THE PROOF

Where Commitment Meets Completion.

PATANCHERU, TELANGANA · PARTNER: JK FENNER – SWASTHYA

JK Fenner – Swasthya Community RO Plant

CHALLENGE

The local community around Patancheru lacked a dependable source of safe drinking water.

SOLUTION

A 500 LPH community RO plant, engineered, installed and commissioned end-to-end by Hydromo under the JK Fenner – Swasthya CSR programme.

OUTCOME

A fully operational plant delivering consistent, tested, safe drinking water to local families every day.

500 LPH

Commissioned and delivering safe water daily
