Hydromo – Powering Sustainability Since 2018

Water | Renewables | Enablers | Curated Solutions For Hospitals & Builders

Founded in 2018, Hydromo has grown into one of India's top 10 companies in the water and renewable energy sectors. For over 8 years, we've been driven by one purpose, to make clean water and sustainable energy accessible, efficient, and affordable across industrial, commercial, and residential spaces.

Why Choose Hydromo?

Every project has a different decision-maker – and a different set of priorities. Here's why the people who matter most keep choosing us.

For MEPs - Specs & Integration Support

Hydromo works alongside MEP consultants from design stage to commissioning – providing technical data sheets, system sizing inputs, and on-site coordination so every solution integrates without friction.

For Builders - One Vendor. One Timeline.

Managing multiple agencies for water, energy, and utility systems creates delays and gaps in accountability. Hydromo brings it all under one roof – STP, solar, pumps, generators, and more – so your project stays on schedule, and your handover stays clean.

For Architects - Systems That Adapt to Your Design

Our solutions are engineered around the constraints, aesthetic intent, and project brief of architects, whether it's a packaged STP that fits a tight basement or a solar setup that doesn't interrupt the roofline.

For Facility Owners & Operators - Compliance Without the Headache. Lower Opex Over Time.

From APCCB/TSPCB clearances to AMC contracts, Hydromo handles the obligations that come after handover. Our systems are designed to reduce your operational costs.

Hydromo integrates with their workflow

01

SITE SURVEY

We visit, assess, and understand your site before recommending anything.

02

DESIGN

Our engineers design a system built around your space, budget, and performance targets.

03

APPROVALS

We handle PCB compliance, documentation, and regulatory clearances on your behalf.

04

INSTALLATION

Our teams execute on-site with speed — without cutting corners on quality.

05

HANDOVER

Full system walkthrough, documentation, and training so your team knows exactly what's running.

06

AMC

Post-handover, we stay on — scheduled maintenance, performance monitoring, and support whenever you need it.

WATER TREATMENT SOLUTIONS

Water Treatment Plants

The 3-Stage Filtration Process.

- Glass Media | Activated Carbon | Resin

Reverse Osmosis

High-purity water ideal for sensitive industrial & commercial needs

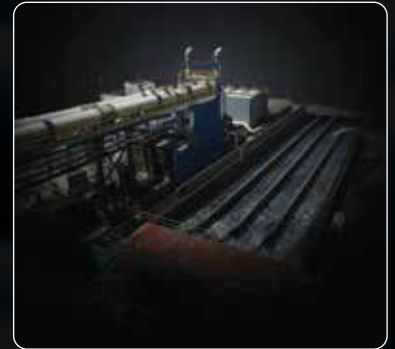

Softeners

Prevents scale buildup & extends appliance life.

Ultra Filtration

Clears turbidity, Suspended Solids & Pathogens.

Desalination

Converts seawater into drinkable water with energy-efficient systems.

Dialysis

Superior purity using Electro-Coagulation technology.

RO with Chillers

Converts seawater into drinkable water with energy-efficient systems.

Our Technical Partners

WASTEWATER MANAGEMENT SOLUTIONS

Packaged STP

Turn wastewater into something usable with Hydromo's sewage treatment plant.

Traditional STP

ETP

Smart Wastewater Solutions for a Cleaner & Sustainable Future.

Electro-coagulation

An advanced and economical water treatment technology.

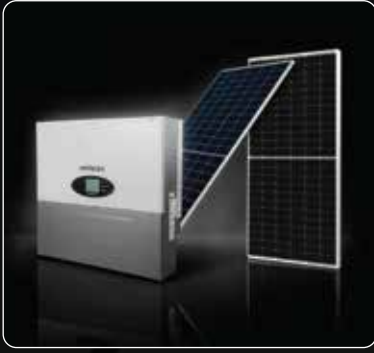

ZLD

The ultimate solution for total water recovery

Hydromo's PMC Services

Your One-Stop Partner for Project Approvals, Compliance & Clearances in AP & Telangana

Founded in 2018, Hydromo has grown into one of India's top 10 companies in the water and renewable energy sectors. For over 8 years, we've been driven by one purpose, to make clean water and sustainable energy accessible, efficient, and affordable across industrial, commercial, and residential spaces.

We Serve

Industrial Projects

Manufacturing units, pharma plants, warehousing, food processing, and more.

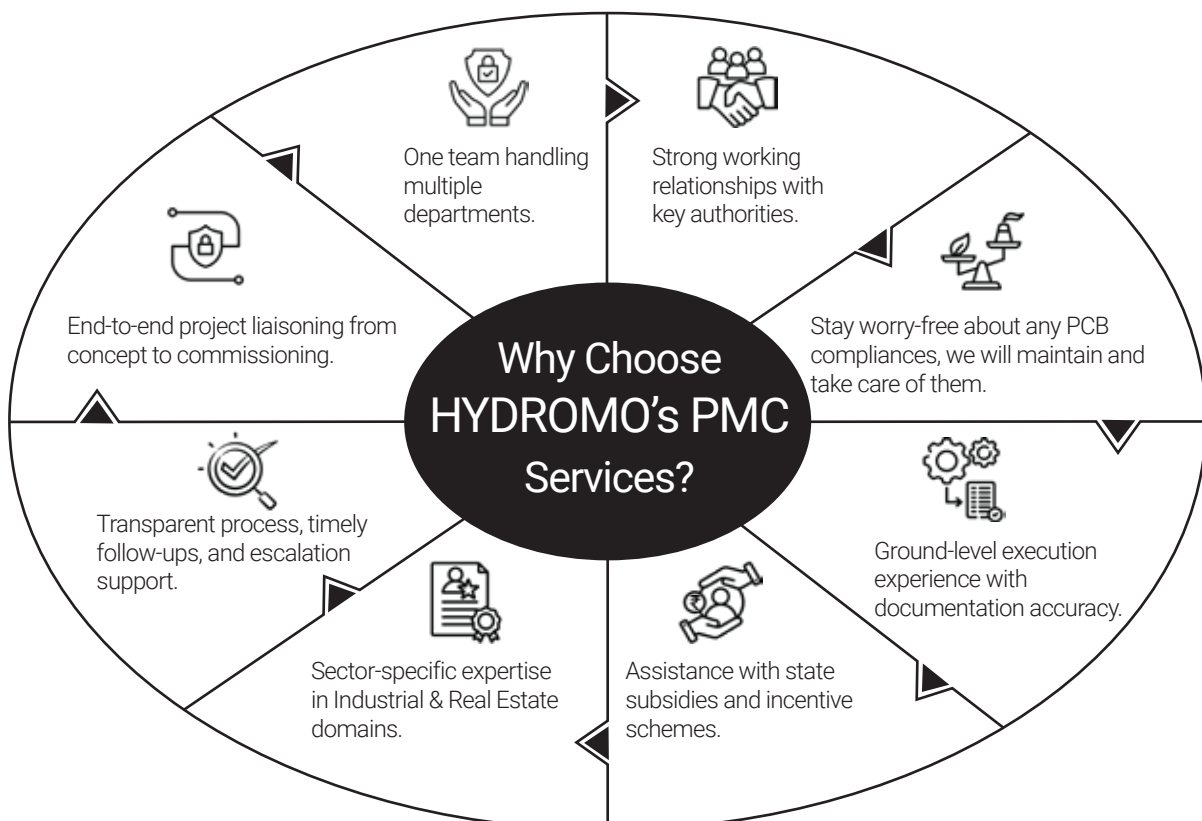

Real Estate Projects

Residential townships, gated communities, commercial towers, resorts, and plotted layouts.

PCB Compliance - A Critical Component

Environmental compliance is no longer optional – it's mandatory. Hydromo helps you comply with APPCB & TSPCB guidelines.

We ensure your project is environmentally responsible and future-ready.

Builders Kit

Empowering Builders with Smart Water & Energy Solutions

At Hydromo, we make it easy for builders to create efficient, sustainable, and future-ready projects with powerful water and energy systems, all under one roof.

OUR ESTEEMED CLIENTS

Hospital Kit

Make Your Hospital Future-Ready & Eco-friendly

Hospitals demand the purest water and the most reliable systems to ensure patient safety and operational efficiency. Hydromo offers comprehensive water treatment, renewable energy, and advanced pumping solutions tailored for healthcare excellence.

OUR ESTEEMED CLIENTS

Hospitality Kit

Infrastructure that keeps hospitality seamless, silent, & guest-ready.

Hydromo's Hospitality Kit brings together the essential systems that keep high-expectation hospitality spaces running flawlessly. Designed for resorts, hotels, breweries, pubs, and farm stays, it ensures operations remain smooth even under high footfall.

HYDROEN

All-In-One Luxurious & Eco-Friendly Solutions for Villa Owners

Why Should You Choose HydroEn?

Convenient

HydroEn offers seamless water and energy solutions designed to enhance your villa luxuriously & sustainably, from start to finish.

Advanced Technology

Leverage cutting-edge modern technologies for efficient, sustainable, and future-ready water and energy systems.

Customised

Tailored solutions that align perfectly with your villa's size and financial plan.

One-stop solution

From water treatment to renewable energy, HydroEn is your one-stop destination for your Villa.

Regular Maintenance

Comprehensive post-installation services, regular check-ups, and expert care to ensure the longevity and performance of your systems.

Professional Support 24 X 7

Our team is always available to assist whenever you need us.

Quick Installation

Quick delivery and setup to keep everything on schedule.

From premium water treatment solutions to energy-efficient systems, HydroEn has everything you need to elevate your villa, making it more luxurious and sustainable.
